

Plant warranty

Watering is the essential part of successful plantings. Directly after installing the plant needs to be watered in with a minimum of one gallon, depending on size of the rootball.

Maintenance of the plant is either the installer or homeowners responsibility.

Proper mulching and watering is required for a warranty to be offered.

If rainfall does not exceed an inch a week. Watering the new plants will be required minimally every 5-7 days. If the plant fails within 30 days, a full replacement will be provided when the dead plant is returned to Garden Expressions. If the plant is suffering and you are unsure please contact us as soon as possible by calling 715-246-0257 or texting a picture. After 30 days, the warranty will cover 50 percent of the plant cost for up to one year from date of purchase.

The plant or root crown must be returned. Photo back up of the suffering part would be appreciated.

We will not warranty any plants with a USDA Hardiness zone of 5 or higher.
